TWO SOURCES. TWO PURPOSES. STAY CONNECTED.

There are now two easy ways to stay connected to what is happening at OHAP. BlueOvalNow is Ford's company communication source for plant announcements, production changes, safety and quality information, events, and other company updates. The UAW Local 2000 OHAP Bulletins page is the Union Hall's source for Union communications, bulletins, member updates, and information from your elected representatives. They are separate sources, and I encourage everyone to use both so you are getting information directly from the Company and directly from your Union.
